

Twin Six Speedy U.S.A.

Twin Six put their spin on the stars and stripes with the Speedy Bike Club U.S.A. Jersey (\$75). Not red, white and blue, rather, red, black and cream coloring adorn a 100% polyester microfiber jersey that is made in the U.S.A. It has a 16" hidden YKK zipper on the front to help keep you cool and three deep back pockets to hold your stuff. Two side panels provide a perfect fit for the club raglan cut. Elastic wraps the sleeves and waist. Add the matching 6" wool socks made by SockGuy (\$12) or Speedy U.S.A. bib shorts (\$95) and cycle in serious style. Check the Twin Six website for current size availability. www.twinsix.com

ODI Lock-On Grips

The ODI/Troy Lee Design Lock-On Grips are a sure way to keep your hands and grips on the handlebar. Their clamp-on design prevents the grip from spinning around the bar, and just as important, the

grip surface has raised edges to prevent hand slippage when wet. Mud and water grooves funnel the slop away from the surface, and a built-up flap protects the outside clamp from damage during a crash. The inner clamps have etched lines to assist in installing brake levers evenly. The ODI grips measure 4.5" long by 3.75" round. All hardware is included. Available in four grip/clamp color configurations for \$29. Made in U.S.A.

Darn Tough Socks

Whether you like wool or Coolmax covering your feet, Darn Tough has a sock to fit your preference. Their wool offering is made from fine gauge Merino wool blended with nylon and Lycra. They feel super-soft, are highly breathable, and as much as we harp about our love for wool at *Dirt Rag*, you should know by now that wool is naturally antimicrobial and temperature regulating. Their Coolmax sock is knitted with select yarns to pull moisture away from the skin to help keep feet cool in the summer and warm in winter. Both varieties are available in 1/4 length or ankle height, with or without cushion and mesh. Each has deep heel pockets, mid-foot support, and a reinforced heel, toe and foot bottom. The Darn Tough website has a size chart and list of retailers searchable by state. \$12-15. Made in U.S.A. www.darntough.com

Serfas TGU-2 Saddle

Saddles. We all have a favorite, but if you are in the market for a wide, supportive model, Serfas may have one for you. Their TGU-2 dual-density saddle measures 280mm long by 140mm wide. It has a relief channel spanning

nearly the entire length to help relieve pressure in sensitive areas. The TGU-2 feels soft, yet remains supportive, has a waterproof microfiber cover, and no stitching on the sitting area to irritate your bottom side. With titanium rails, it weighs 314g and retails for \$80. Its TGU-3 chromoly rail cousin weighs 355g and costs \$50. A 90-day comfort and satisfaction guarantee is included. Made in Taiwan. www.serfas.com

PocketToolX MAKO

Named after one of the fastest and most acrobatic sharks, the MAKO tool is anything but a killer. This 42g titanium tool may be somewhat shaped like a fish, but is more suited for bike repairs. The 3.5" x 1.2" x 3mm body contains four 1/4" drive bits in a Neoprene holder—a Phillips screwdriver, T25 Torx, and 5 and 6mm Allen bits—all of which use the "eye" as a driver and your fingers to keep the bit from falling out the opposite side. Also included around the tool are 14 and 15g spoke wrenches, 8, 9, 10, 15, and 16mm box wrenches, a bottle opener, and a lanyard. The MAKO retails for \$69. An upgrade kit to carry eight important-to-you bits retails for \$10 and is available on their website. Made in U.S.A. www.pockettoolx.com

Pacenti Neo-Moto 650B Tire

Looking for an all condition XC tire for a 650B wheel? Pacenti's Neo-Moto 650B x 2.1" tire features directional, ramped center knobs for fast rolling, and a row of rectangular outer knobs for cornering. A triangle of square knobs flank the rectangular knobs and are held firm with small tie-bars to increase stiffness and stability when leaning into the corners. The Neo-Moto weighs 635g and is recommended for use with 35-55psi. If you like

a wider tire, a 2.3" version weighing 745g is also available. Both versions are made with 67tpi casing and are a 60A durometer compound. \$59. Made in Japan by Panaracer. www.bikelugs.com
