Twin Six

By [David Arthur](#)

Twin Six is the outcome of two designers who saw a chance for 'better cycling jersey graphics,' according to their website. There's certainly room for an improvement in the styling of a lot of cycling garments, but we'll let you decide whether the offerings from Twin Six are a hit.

And there's certainly plenty of different designs to keep most tastes contented, such as the Argyle, the Speedy and the Alpe D'Huez pictured. The jerseys are made from 100% polyester microfibre with sublimated graphics, a 16" zip and three pockets. Available in sizes S to XXXL.

As well as jerseys, the company also produces t-shirts, bags, caps and more socks than you can shake a foot at.
